

2/13/2020 Week 5 Module 2

Interactive Exercise for Molecular Dynamics

- In this module, you will learn how to
 - navigate the UNIX terminal
 - execute programs with a command line interface (CLI)
 - run a short MD simulation on your desktop machine
 - visualize the simulation with VMD
- In this class session you will also work on preparing your team's target for MD simulation

The UNIX Terminal and Command Line Interface (CLI)
