

Review Questions

- Why is there interest in structure-based drug design?
- What are the physiological functions of the biological macromolecules targeted by drugs?
- What are biological macromolecules made of?
- What does it mean for a biological macromolecule to be folded?
- How do most drugs interact with their targets?

Misc

- A beautiful short video on “A basic introduction to drugs, drug targets, and molecular interactions”: <https://www.youtube.com/watch?v=u49k72rUdyc>
