

- Press 1 and then click to label specific atoms. Where (what residue numbers) are the unique parts of the human structure?
 - 114 to 125
 - 142 to 157
- You can remove the labels by going to the “Graphics” menu under “Labels”, selecting labels, and deleting them.

- The location of the active site is a lot more evident if you create a representation with Selected Atoms as “resname D16 or resname UMP”, Color Method “Element”, and Drawing Method “Licorice”
