# Visualizing Electrostatic Potentials with VMD

- Load the models of TS from human, E. coli, and W.g.b. The files are available on <u>github</u>.
- Use the "NewCartoon" representation and color human gray (2), E. coli orange (3), and W.g.b. yellow (4)
- Your display should look something like the image to the right
- Which of the enzymes is least like the others?
